

SJES OWC

Convert your Spoil to Soil using our Organic Waste Converter

SJES OWC is a pioneering decentralized organic waste treatment system. Our patented system rapidly processes organic waste into rich compost. The system is fast, efficient, easy to install and requires minimal training for operation.

15 minute treatment, 10 day storage in crates and your compost is ready for use!

The **SJES OWC** is an ideal solution for bulk waste generators such as:

Residential societies
Hotels/Restaurants
Educational Institutes
Office Canteens

Hospital Kitchen/Canteen
Industrial Canteens
Agriculture Markets
Places of Worship
